WORK EXPERIENCE

Systems Engineer @ Infosys | 2 years

(July 2021- May 2023)

- Involved in technical tasks for creating several websites such as development, enhancement and maintenance of the sites.
- Optimized website performance by reducing page load time by 50% through the strategic implementation of React JS, CSS, JavaScript resulting in improved user satisfaction and a 20% increase in organic traffic.
- Created new features, functionality and capabilities on the eCommerce sites using React and managed state using react-redux.
- Performed quality assurance tests on various sites to ensure cross browser compatibility and mobile responsiveness.
- Developed react components such as Carousel cards, Search bar to fetch data from API and FAQ Component for the obtained designs from Figma by UI team.
- Worked with version control systems like Git to manage code and collaborate with other developers.
- Collaborated with back-end developers to ensure seamless integration of front-end and back-end functionality.
- Implemented best practices for SEO and web analytics by implementing lazy loading of images, minification of scripts, relying on caching etc to reduce the load time.
- Familiar with Agile methodologies, Scrum and Jira to effectively manage projects.

EDUCATION

- **Bachelor of Technology | 2017 - 2021**
Sreenidhi Institute of Science and Technology, Hyderabad. *Grade: 7.14*
- **Intermediate/Class-12 | 2015 - 2017**
Narayana Junior College, Hyderabad. *Marks: 963*

SKILLS

React JS	Next JS	JavaScript	TypeScript
Redux	Node JS	Express JS	MongoDB
RTK	Tailwind CSS	HTML	CSS
SCSS	Git	Material UI	Headless UI

PROJECTS

[Flexible](#) – A job platform for developers

- UI is developed by Next JS 13, TypeScript, Tailwind CSS. Similar to dribbble but for developers. We can showcase our projects and get hired.
- Used Next AUTH for authentication, Grafbase for serverless GraphQL databases.

[Easy Pizza](#) – COD based pizza delivery web app

- Order pizza by providing basic details and pay after delivery.
- UI built using React, Tailwind CSS. State management is done using Redux.

[Chatbot](#) - Student- Dean slot booking made easy

- Chatbot for student-dean slot booking.
- Integrated React-chatbot-kit for chatbot. Redux for state management.

[World wise](#)

- Track the places visited and add notes about it. Locate and pin position on the map and add/remove a city visited.
- React is used for building front-end. Context API and useReducer hook are used for state management.

[Netflix Clone](#)

- An OTT web app similar to Netflix. Movies data fetched using an API. Built using React functional components and Tailwind and authentication using Firebase.
